ANNEX A

LITERATURE REVIEW SUMMARY

Annex A contains the literature review which is a primary deliverable of this respiratory exposure study. The information in Annex A is included as two separate tables: Table A-1 and Table A-2.

Table A-1 is the literature review summary sorted by document number. These document numbers have been assigned in the random sequence that they were obtained. These numbers are referenced in the body of this document.

Table A-2 is the same literature review summary, but it is sorted first by its assigned relevance category (i.e., "critical", "major", "minor", "reference", and "support") and second by primary author. Chapter 3 of this report contains the details of how this literature review was analyzed and compiled.

Doc# Author	Secondary Authors	sorted by Doc	one to •	Year/ Volume/ Pages	Relevance Category # Citation	
001 Gold, A	Burgess, WA; Clougherty, EV	Exposure of firefighters to toxic air contaminants	American Industrial Hygiene Journal	1978 39 533-539	PF a	Study of exposure levels of Boston FFs to variety of fire gasses, includes plans for las analyzer mounted in turnout jacket
002 Jankovic, J	Jones, W; Burkhard, J; Noonan, G	Environmental study of firefighters	Annals of Occupational Hygiene	1991 35 581-602	PE	Study measuring FF exposure during nockdown and overhaul, details test nethods, separates based on activity, neasures inside and outside SCBA
Jankovic, J	Jones, W; Castamova, V; Dalal, N	Measurement of short- lived reactive species and long-lived free radicals in air samples from structural fires	Applied Occupational and Environmental Hygiene	1993 8 650-658	EP r	Study measuring short-and long-lived fre- adicals in overhaul situations, for a rariety of test methods, concluding enough free-radicals could be present to have a toxicological effect
Rothman, N	Ford, DP; Baser, ME; Hansen, JA; O'Toole, T; Tockman, MS; Strickland, PT	Pulmonary function and respiratory symptoms in wildland firefighters	Journal of Occupational Medicine	1991 33 1163-1167	PE	Study of lung function in forest and vildland FFs, draws comparisons letween urban and wildland exposure
Sherman, CB	Barnhart, S; Miller, MF; Segal, MR; Aitken, M; Schoene R; Daniell, W; and Rosenstock, L	Firefighting acutely increases airway responsiveness	American Review of Respiratory Diseases	1989 140 185-190	PE	Study showing that FF activity can increase airway responsiveness, which may lead to a higher loss of ventilary unction
006 Slaughter, JC	Koenig, JQ; Reinhardt, TE	Association between lung function and exposure to smoke among firefighters at prescribed burns	Journal of Occupational and Environmental Hygiene	2004 1 45-49	PE a	Study reporting changes in FF spirometry is a result of exposure to known juantities of fire products, as well as ove the course of a shift
007 Treitman, RD	Burgess, WA; Gold, A	Air contaminants encountered by firefighters	American Industrial Hygiene Journal	1980 41 796-802	FP 9	Data reporting concentration of several passes and particulate matter from FF nounted sampling devices
Anthony, TR	Joggerst, P; James, L; Burgess, JL; Leonard, SS; Shogren, ES	Evaluation of Air Purifying Respirator Cartridges for Fire Overhaul Exposures	Journal of Occupational and Environmental Hygiene	2006	TPE c	Reviews two commonly used respirator artridges, establishes testing procedures, reports concentrations, eveals avenues of further study, evaluates actual health risk
Bolstad- Johnson, DM	Burgess, JL; Crutchfield, CD; Storment, S; Gerkin, R; Wilson, JR	Characterization of firefighter Exposures During Fire Overhaul	American Industrial Hygiene Journal	61 636-641	EPT 9	Evaluates presence of harmful airborne jases/particles/chemicals during overhaul, gives sampling methods for uture data collection, reports measurable juantities and potential side effects, ecommends using SCBA during overhau or lack of a better alternative respirator
010 Burgess, JL	Brodkin, CA; Daniell, WE; et al	Longitudinal decline in firefighter DLCO measurements: a respiratory surveillance dilemma	American Journal of Respiratory and Critical Care Medicine	1999 159 119-124		year study on FF lung function with pirometry and CO diffusion tests
011 Burgess, JL	Nanson, CJ; Bolstad- Johnson, DM; Gerkin, R; Hysong, TA; Lantz, RC; Sherrill, DL; Crutchfield, CD; Quan, SF; Bernard, AM; Witten, ML	Adverse Respirator Effects Following Overhaul in Firefighters	Journal of Occupational and Environmental Medicine	2001 43 467-473	PT	Testing using actual FFs, results correlated with other occupations, cites neasurement methods

138 Austin, C	Dussault, G	Toxic Risk Assessment for Fire Fighters	Paper Presented at NFPA World Safety Congress and Exposition	2003	Minor PE	Applicable information; however, this is only available as a set of power point slides and not as a full paper.
139 Austin, C	ı	Municipal Firefighter Exposures to Toxic Gases and Vapours	Ph.D. Dissertation, Dept. of Occupational Health, Faculty of Medicine, McGill University, Montreal, Quebec, Canada	1997 April 1997	Major EPT 1	Comprehensive overview of respiratory hazards facing municipal fire fighters
140 NIOSH	9	NIOSH Pocket Guide to Chemical Hazards	DHHS (NIOSH) Publication No. 2005 -149, US Government Printing Office	2005	Support E	Provides threshold limit values for gases that are often measured during overhaul, as compiled by the National Institute for Occupational Safety and Health (NIOSH).
141 Kirk, KM		Air Contaminants at Residential Fire investigation Scenes	Ph.D. Dissertation submitted to the School of Physical and Chemical Sciences, Queensland University of Technology, Brisbane, Australia		Critical E	A review of the atmospheric contaminants present at a post fire scene, with a particular focus on the respiratory hazards facing fire investigators.
142 NIOSH		Performing Overhaul at a Fire in a Three-Story	Fatality Assessment and Control Evaluation Investigative Report #F2006-09. U. S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, NIOSH, 4676 Columbia Parkway, MS C-13, Cincinnati, OH 45226	2006 F2006-09	Major EPT	Provides a case study of a fire fighter Line of Duty Death (LODD) that occurred during overhaul not caused by any sudden external event (e.g., fall, structural collapse, electrocution, etc), as investigated by the National Institute for Occupational Safety and Health (NIOSH).
143 Bansemer, B	Wittbecker, FW	Scientific Methods for the Assessment of Smoke Gas Toxicity in Concrete Risk Solutions	vfdb - Zeitschrift: Forschung, Technik und MAnagement im Brandscutz. Vereinigung zur Forderung des Deutschen Brandschutzes	2007 Aug 08 / 3 133-140	Major E	Provides a scientific assessment of the toxic effect of fire atmospheres based on smoke gas toxicity, and on this basis addresses safety as quantified by the difference between evacuation time and maximum time before escape time becomes untenable.
144 ISO		ISO 13571, Life- threatening components of fire - Guidelines for the estimation of time available for escape using fire data	International Standard ISO 13571, First Edition	2007	Minor E	Describes a methodology that provides a framework for use in estimating the time available for escape based on, among other factors, inhalation of asphyxiant gases and exposure to sensory/upper-respiratory irritants.
145 Miedinger, D	Gysin, C; Wanzenried, AB; Schindler, C;	Respiratory Symptoms, Atopy and Bronchial Hyperreactivity in Professional Firefighters	European Respiratory Journal, Sept 2007	2007 30 (3) 538-544	Critical P	An assessment of respiratory health in professional fire fighters conducted on 101 male professional fire fighters in Switzerland, against a control group of 735 Swiss males. The results show that the fire fighters has a greater rate of atopy and bronchial hyperactivity.
146 Youakim, S		Firefighters: A	Archives of Environmental & Occupational Health, Sept-Oct 2006	2006 61 (5) 223-231	Critical P	Estimate of the risk of colon, bladder, kidneys, and brain cancers, and non-Hodgkins lymphoma and leukemia, among fire fighters. Results indicate elevated risk exists depending on second, third or fourth decade of fire fighting service.

147 LeMasters, GK	Genaidy, AM; Succop, P; Deedens, J; Sobeih, T; Barriera-Viruet, H; Dunning, K; Lockey, J	Cancer Risk Among Firefighters: A Review and Meta-Analysis of 32 Studies	Journal of Occupational and Environmental Medicine, Nov 2006	2006 48 (11) 1189-1202	P 1	A qualitative and quantitative determination of cancer risk using a meta analysis of 32 studies on fire fighters. The risk of 21 different cancers was based on patterns using meta-relative risks, study type, and heterogenity testing. Results indicate elevated risk for certain types of cancer.
148 Bates, MN	Fawcett, J; Garrett, N; Amold, R; Pearce, N; Woodward, A	Is Testicular Cancer an Occupational Disease of Fire Fighters?	American Journal of Industrial Medicine, Sep 2001	2001 40 (3) 263-270	P 12	A Historical cohort study of mortality and cancer incidence for all career fire fighters in New Zealand from 1977 to 1995 confirms as earlier study that they are at an elevated risk for testicular cancer, for unknown reasons.
149 Golden, AL	Markowitz, SB; Landrigan, PJ	The Risk of Cancer in Firefighters	Occupational Medicine - State of the Art Reviews, Oct-Dec 1995	1995 10 (4) 803-820	Major P 21	An review of the risk of cancer in fire fighters.
150 Wallace, M		First Breath	Fire Chief, Oct 1 2007	2007 52-58	Minor E	Overview of history of SCBA and other respiratory equipment.
151 Ma, FC	Fleming, LE; Lee, DJ; Trapido, E; Gerace, TA	Cancer Incidence in Florida Professional Firefighters, 1981 to 1999	Journal of Occupational and Environmental Medicine, Sep 2006	2006 48 (9) 883-888	P 1	An examination of the cancer risk for professional Florida firefighters as compared to the general Florida population, which indicates an increased risk of selected site-specific cancers in male and female fire fighters, and an overall increased cancer risk in female fire fighters.
152 Baris, D	Garrity, TJ; Telles JL; Heineman, EF; Olshan, A; Zahm, SH	Cohort Mortality Study of Philadelphia Firefighters		2001 39 (5) 463-476	P 11	A retrospective cohort mortality study of 7,789 Philadelphia fire fighters employed between 1925 and 1986 found no significant increase in overall mortality bu did find an increased risk for colon and kidney cancer, and for non-Hodgkin's Lymphoma and multiple myeloma.
153 Bates, MN]	Registry-Based Case- Control Study of Cancer in California Firefighters	American Journal of Industrial Medicine, May 2007	50 (5) 339-344	Critical P	A review of records for all male cancers registered in California from 1988 to 2003 confirms certain earlier studies that indicate possible elevated cancer risks to fire fighters.
154 Choi, BCK		A Technique to Re- Assess Epidemiologic Evidence in Light of the Healthy Worker Effect: The Case of Firefighting and Heart Disease	Journal of Occupational and Environmental Medicine, Oct 2000	2000 42 (10) 1021-1034	P 9	A review of the Healthy Worker Effect and its possible bias in 23 earlier studies is reviewed. The conclusion indicate evidence of an increased risk of death in fire fighters from heart disease.
155 Ma, FC	Lee, DJ; Fleming, LE; Dosemeci, M	Race-Specific Cancer Mortality in U.S. Firefighters: 1984-1993	Journal of Occupational and Environmental Medicine, Dec 1998	1998 40 (12) 1134-1138	P 11	A study of race-specific cancer risk among firefighters from 24 states using death certificate data from 1984- 1993 shows that elevated risk for certain cancers based on certain race criteria.
156 Ma, FC	Fleming, LE; Lee, DJ; Trapido, E; Gerace, TA; Lai, H; Lai, SH	Mortality in Florida Professional Firefighters: 1972-1999	American Journal of Industrial Medicine, June 2005	2005 47(6) 509-517	P 5	Review of occupational exposure to 34,796 male and 2,017 female professional fire fighters in Florida from 1972 to 1999 as compared to the general Florida population show excess mortality risk for certain types of cancers.
157 Melius, J		Occupational Health for Firefighters	Occupational Medicine - State of the Art Reviews, Jan-Mar 2001	2001 16 (1) 101-108	Major P 5	A review of the risk of coronary heart disease and pulmonary function in fire fighters.

176 Heyer, N	Weiss, NS; Demers, P; Rosenstock, L	Cohort Mortality Study of Seattle Fire Fighters: 1945-1983	American Journal of Industrial Medicine	1990 17 (4) 493-504	Critical P 27	A cohort study of mortality related to respiratory concerns of fire fighters in Seattle from 1945 to 1983.
177 Raymond, LW	Guidotti, TL; Rosenman, KD	Diabetic Firefighters	Journal of Occupational and Environmental Medicine, Jun 2002	2002 44 (6) 492-494	Minor	Overview of heart disease and mortality concerns involving diabetic fire fighters.
178 Choi, BCK		Mathematical Procedure to Adjust for the Healthy Worker Effect: The Case of Firefighting, Diabetes, and Heart Disease	Journal of Occupational and Environmental Medicine, Dec 2001	2001 43 (12) 1057-1063	Minor P	A mathematical procedure is provided to adjust for one component of the healthy worker effect (HWE) on diabetes involving fire fighters and heart disease.
179 Gu, TL	Liou, SH; Hsu, CH; Hsu, JC; Wu, TN	Acute Health Hazards of Firefighters After Fighting a Department Store Fire	Industrial Health	1996 34 (1) 13-23	Major P 1	The health of fire fighters is reviewed after a 40 hour department store fire, with the respiratory symptoms of 168 fire fighters collected and measured. The results show that fire fighters are exposed to irritants during fire fighting, which could lead to pulmonary function defects.
180 McDiarmid, MA	Agnew, J	Reproductive Hazards and Firefighters	Occupational Medicine - State of the Art Reviews, Oct-Dec 1995	1995 10 (4) 829-841	Minor P	An overview of reproductive hazards and occupational exposure for fire fighters.
181 Hansen, ES		A Cohort Study on the Mortality of Firefighters	British Journal of Industrial Medicine, Dec 1990	1990 47 (12) 805-809	Major P 21	A mortality study on fire fighters.

182 Lio	ou, SH	Jacobsonkram, D; Poirier, MC; Nguyen, D; Strickland, PT; Tockman, MS	Biological Monitoring Of Fire Fighters - Sister Chromatid Exchange And Polycyclic Aromatic Hydrocarbon-dna Adducts In Peripheral- Blood Cells	Cancer Research, Sep 1 1989	49 (17) 4929-4935	Major P 66	A review of certain physiological concern in fire fighters.
183 Ver	na, JE	Fiedler, RC	Mortality of a Municipal Worker Cohort: Fire Fighters	American Journal of Industrial Medicine	1987 11 (6) 671-684	Major P	A cohort study of mortality rates for fire fighters.
184 Ro	senstock, L	Olsen, J	Firefighting and Death from Cardiovascular Causes	New England Journal of Medicine, Mar 22 2007	2007 356 (12) 1261-1263	Major P	Review of cardiovascular risks for fire fighters.
185 Elli	iot, DL	Goldberg, L; Kuehl, KS; Moe, EL; Breger, RKR; Pickering, MA	The PHLAME (Promoting Healthy Lifestyles: Alternative Models' Effects) Firefighter Study: Outcomes Of Two Models Of Behavior Change	Journal of Occupational and Environmental Medicine, Feb 2007	2007 49 (2) 204-213	Minor	An approach to promote healthy lifestyles as applied to fire fighters.
186 Ho	klder, JD	Stallings, LA; Peeples, L; Burress, JW; Kales, SN	Firefighter Heart Presumption Retirements in Massachusetts: 1997-2004	Journal of Occupational and Environmental Medicine, Oct 2006	2006 48 (10) 1047-1053	Minor P	A retrospective study of Massachusetts fire fighters retiring with heart disability awards, based on 362 retired fire fighters compared to 310 active professional fire fighters during the period 1997 to 2004. The result call for improved cardiovascular prevention for fire fighters
187 Sjo	ogren, B	Johanson, G	Mortality in Florida Professional Firefighters, 1972-1999	American Journal of Industrial Medicine, Feb 2006	2006 49 (2) 138-140	Major P	A review of mortality among fire fighters i Florida from 1972 until 1999.
188 Na	gaya, T	Yoshida, H; Takahashi, H; Kawai, M	Policemen and Firefighters Have Increased Risk for Type -2 Diabetes Mellitus Probably Due to their Large Body Mass Index: A Follow-Up Study in Japanese Men	American Journal of Industrial Medicine, Jan 2006	2006 49 (1) 30-35	Minor P	A comparison of health related issues between 897 police and fire fighters in Japan as compared to a control group of 5,130 Japanese men, with a focus on Type-2 diabetes.
189 Ga	rver, JN	Jankovitz, KZ; Danks, JM; Fittz, AA; Smith, HS; Davis, SC	Physical Fitness of an Industrial Fire Department vs. a Municipal Fire Department	Journal of Strength and Conditioning Research, May 2005	2005 19 (2) 310-317	Minor P	Results of comparative physiological test of a Industrial Fire Department and a nearby Municipal Fire Department showed that they have similar strength and conditioning characteristics.
190 Ste	efanidou, M	Athanaselis, S	Toxicological Aspects of Fire	Veterinary and Human Toxicology, Aug 2004	2004 46 (4) 196-199	Major EP 2	A review of the toxicology of the toxic substances in fires and the specific chemical hazards to fire fighters.
191 Lali	lic, H	Bukmir, L; Ferhatovic, M	Simulation of Working Conditions by Maximum Work Load on Firefighters	Collegium Antropologicum, Mar 2007	2007 31 (1) 153-158	Minor	Various physical tests and physiological measurements of Croatian fire fighters to determine if manpower is adequate to the requirements in the field under the most severe conditions.
192 Ho	olmer, I	Gavhed, D	Classification of Metabolic and Respiratory Demands in Fire Fighting Activity with Extreme Workloads	Applied Ergonomics, Jan 2007	2007 38 (1) 45-52	Minor P 3	Measurements of metabolic and respiratory responses in 15 male professional fire fighters under extreme workloads.

215 Mier, CM	Gibson, AL	Evaluation of a treadmill test for predicting the aerobic capacity of firefighters	Occupational Medicine - Oxford, Sep 2004	2004 54 (6) 373-378	Minor P	The evaluation of a treadmill test for predicting the aerobic capacity of firefighters.
216 Eves, ND	Petersen, SR; Jones, RL	Submaximal exercise with self-contained breathing apparatus: The effects of hyperoxia and inspired gas density	Aviation Space and Environmental Medicine, Oct 2003	74 (10) 1040-1047	Minor TP	Test on fire fighters using SCBAs demonstrate that helium-based gas mixtures, and to a lesser extent HOX, reduce the expiratory work associated with the SCBA during strenuous exercise.
217 Selkirk, GA	McLellan, TM	Physical work limits for Toronto firefighters in warm environments	Journal of Occupational and Environmental Hygiene, Apr 2004	2004 1 (4) 199-212	Minor PT 3	Thirty-seven Toronto fire fighters are measured for various physiological affect while wearing SCBA under different environmental conditions.
218 Samo, DG	Bahk, JK; Gerkin, RD	Effect of firefighter masks on monocular and binocular peripheral vision	Journal of Occupational and Environmental Medicine, Apr 2003	2003 45 (4) 428-432	Minor T	A study of SCBA masks indicates that they have an average loss of 28 degrees of periphial vision.
219 Reinhardt, T	E Ottmar, RD; Hanneman	Smoke Exposure Among Wildland Firefighters At Prescribed Burns in the Pacific Northwest	Research Paper: PNW-RP-526; USDA Forest Service, Pacific Northwest Research Station	2000 Oct 2000 54	Critical E 9	Smoke exposure at prescribed burns between 1991 and 1994 are studied involving 200 firefighters, and shows that the highest respiratory irritant exposures were about 6 times the recommended limits and peak exposures exceeded recommended limits for short-term exposures.
220 Betchley, C	Koenig, JQ; van Belle, G; Checkoway, H; Reinhardt, T	Pulmonary function and respiratory symptoms in forest firefighters	American Journal of Industrial Medicine, Dec 6 1998	1998 31 (5) 503-509	Critical E 22	This study involved 76 fire fighters and evaluates effects on respiratory health of forest firefighters exposed to high concentrations of smoke during their work shift.
221 Reinhardt, T	E Ottmar, RD; Hallet, MJ	Guide to Monitoring Smoke Exposure of Western Wildfires	Research Paper: PNW-GTR-448; USDA Forest Service, Pacific Northwest Research Station		Critical E	Guidance is provided for using electronic CO monitors, referred to as dosimeters, to track and prevent overexposure to smoke, and includes a protocol for sampling smoke exposure and establishing a smoke-exposure monitoring program.
222 Reinhardt, T	E Ottmar, RD	Smoke Exposure At Western Wildfires	Research Paper: PNW-RP-525; USDA Forest Service, Pacific Northwest Research Station	2000 Jul 2002 84	Critical E 9	Smoke exposure measurements among fire fighters at wildfires in the Western U. S. between 1992 - 1995 showed that although most exposures were not significant, 3 - 5 % of the shift-average exposures exceeded occupational exposure limits for CO & respiratory irritants.
223 Kern, DG	Neill, MA; Wrenn, DS; Varone, JC	Investigation of a unique time-space cluster of sarcoidosis in firefighters	Respiratory Distress,	4 (1) 974-980	Minor P 44	A review of 1,282 active and retired fire fighters and police officers in Providence RI to clarify cases of sarcoidosis, suggesting that firefighters may be at risk of T lymphocyte activation.
224 Yves, A		Toxicity of Fire Smoke	Critical Reviews in Toxicology, July-Aug 2002	2002 32 (4) 259-289	Critical EP 30	Describes the major immediate toxic threats in a fire situation, which are CO, a multitude of irritating organic chemicals, O2 depletion, and heat. Certain polymers that have become widespread in buildings in the last 50 years also resul in hydrogen cyanide and inorganic acids.
